Module Assignment 2 – Ecommerce Home Page using React

1) I have made the 4 components of the home page 1)header.js 2)footer.js 3)slider.js 4)homecover.js
2) I have made different styling css page one for header another one for footer and the third one Home.css for the styling of slider component and Homecover component
3) I added the bootstrap and font awesome to the index.html which worked but as mentioned in the assignment i also installed the fontawesome and used explicitly
4) All the four component i place in the home.js main component as described by the assignment
5) Also I made sure that my page is responsive
